

Promotion:  
Order 3,  
Pay 2.

# High Performance Cutter for Highest Productivity Order 3 Cutters, Pay 2.

For machining higher alloy steels, cast and austenitic materials, high-strength materials up to 1600 N/mm<sup>2</sup> and hardened steel up to 55 HRC.

When placing your order please enter the **promotion code: HP23**.  
Promotion valid until July 31, 2023.

# Up to 70% longer tool life and maximum productivity

The improved technology and increased productivity provide users with a clear performance advantage. Machining with HPC is ideal for trochoidal, edge, corner and slot milling as well as ramping up to 0.5 x diameter.

- Tool life increase of up to 70%
- Great surface quality of the machined workpieces
- Maximum smoothness and process reliability

The promotion includes the entire HPC program included in our new HPC flyer.

When placing your order please enter the **promotion code: HP23**. Promotion valid until July 31, 2023.

HPC P <span>NEW</span>	HPC M <span>NEW</span>	HPC H <span>NEW</span>	HPC U <span>NEW</span>
			
For high alloy steels and cast iron	For austenitic steels, non-ferrous metals and titanium	For hardened steels ≤ 45 to 55 HRC	Full flute milling cutter with large chip removal space for universal application
<b>P</b> <b>K</b>	<b>M</b> <b>S</b> Second choice: <b>N</b>	<b>H</b> <b>P</b> Second choice: <b>K</b>	<b>P</b> <b>M</b> <b>K</b> <b>N</b> <b>S</b>

Cylindrical shank: With and without clamping surface, Safe torque transmission and high balancing quality

Neck relief

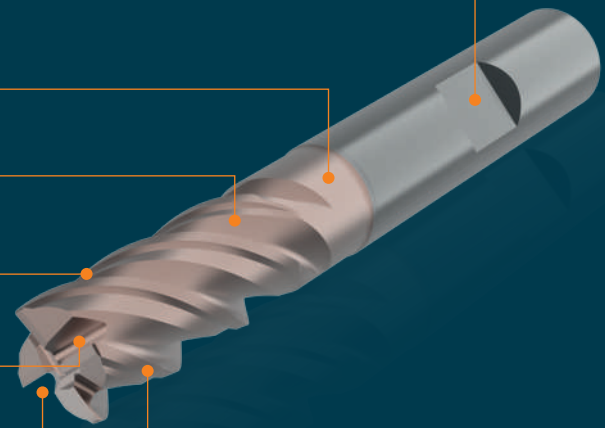

Micro edge preparation

Smooth running due to different helix angles

Cross center cutting, also suitable for diagonal plunging

Optimized flute clearance for better chip removal

State-of-the-art coating
